DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-13, 20-23, and 30-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Huter et al. (U.S. 6,511,496).

Huter et al. discloses substantially as claimed in figures 1-8, a filter (20) comprises a polyurethane film having a thickness of less than about 5um to about 25um (see col. 7, lines 45-49); wherein the polyurethane film including a first and second sections (48) that are bonded together (see col. 7) and furthermore, wherein the filter (20) formed into a sack-like shape which capable of having at least one seam formed from the proximal end to the distal end of the filter element (20).

Allowable Subject Matter

2. Claims 14-19 and 24-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Crank et al. (U.S. 7,163,549) discloses a filter membrane and method of making the same.
